Editorial Board Members' Collection Series: Polycyclic Aromatic Hydrocarbons (PAHs)

Message from the Guest Editors

Polycyclic aromatic hydrocarbons (PAHs) are globally concerned organic pollutants composed of two or more benzene rings connected in a linear, angular or clustered manner, with more than 10000 monomers. PAHs are released into the environment from both natural and anthropogenic sources. The incomplete combustion of organic matter from human activities, such as the combustion of coal, firewood, and other biomass, as well as exhaust emissions from diesel and gasoline vehicles, can lead to the production of PAHs. Natural activities, such as forest fires, grassland fires and volcanic eruptions, also produce PAHs. Due to their ubiquitous distribution, environmental persistence, long-distance transportation capacity and toxic effects on human health and ecosystems, the sources, distribution, migration, fate, toxicity and pollution control countermeasures have received extensive attention in recent decades. We invite investigators to contribute original research articles or review articles that will stimulate the continuing efforts to understand the environmental behaviors, processes, effects and risks of PAHs.

About the Journal

Message from the Editor-in-Chief

Toxics (ISSN 2305-6304) is an international, peer-reviewed, open access journal which provides an advanced forum for studies related to all aspects of toxic chemicals and materials. We aim to publish high quality work that furthers our understanding of the exposure, effects, and risks of chemicals and materials in humans and the natural environment as well as approaches to assess and/or manage the toxicological and ecotoxicological risks of chemicals and materials. Please consider publishing in *Toxics* when preparing your next paper.

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Toxicology) / CiteScore - Q1 (Chemical Health and Safety)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.8 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the second half of 2025).
