

## Special Issue

# Emerging Contaminants in Industrial Hotspots: Characterization, Environmental Fate, Human Exposure, and Risk Assessment

### Message from the Guest Editor

We invite original research articles, reviews, case studies, and technical reports that address the occurrence, transformation, exposure, and risk of emerging contaminants in industrial hotspots. Contributions may include, but are not limited to, the following thematic areas:

- Analytical innovations in industrial hotspots;
- Environmental fate of emerging contaminants in industrial hotspots;
- Exposure science in high-risk industrial settings;
- Risk assessment of emerging contaminants in industrial hotspots;
- Emerging concerns and novel findings.

## About the Journal

### Message from the Editor-in-Chief

*Toxics* (ISSN 2305-6304) is an international, peer-reviewed, open access journal which provides an advanced forum for studies related to all aspects of toxic chemicals and materials. We aim to publish high quality work that furthers our understanding of the exposure, effects, and risks of chemicals and materials in humans and the natural environment as well as approaches to assess and/or manage the toxicological and ecotoxicological risks of chemicals and materials. Please consider publishing in *Toxics* when preparing your next paper.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, AGRIS, and other databases.

#### Journal Rank:

JCR - Q1 (Toxicology) / CiteScore - Q1 (Chemical Health and Safety)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.8 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the second half of 2025).
