

## Special Issue

# Neurotoxicity of Heavy Metals

### Message from the Guest Editors

There have been some human studies showing a significant correlation between serum or urine metals and cognitive function. At the same time, some animal studies have confirmed that a variety of heavy metals are neurotoxic, but the relevant mechanisms are still unclear. This Special Issue focuses on (1) the neurotoxic mechanism of heavy metals and (2) the results of human studies related to heavy metals and nervous system function. Authors are invited to submit original research papers, reviews, or short communications.

## About the Journal

### Message from the Editor-in-Chief

*Toxics* (ISSN 2305-6304) is an international, peer-reviewed, open access journal which provides an advanced forum for studies related to all aspects of toxic chemicals and materials. We aim to publish high quality work that furthers our understanding of the exposure, effects, and risks of chemicals and materials in humans and the natural environment as well as approaches to assess and/or manage the toxicological and ecotoxicological risks of chemicals and materials. Please consider publishing in *Toxics* when preparing your next paper.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, AGRIS, and other databases.

#### Journal Rank:

JCR - Q1 (Toxicology) / CiteScore - Q1 (Chemical Health and Safety)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.1 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).
