Dioxins and Dioxin-Like Compounds: Toxicological Impacts on Human Health

Message from the Guest Editors

We are pleased to invite you to submit a paper aiming to investigate the effects of the exposure of AHR ligands such as dioxins and PAHs on human health using not only epidemiological methods, but also in vivo and in vitro experimental approaches. The toxicity of dioxin and its related compounds on developmental and aging processes and maintaining physiological functions is the main scope of the current Special Issue. The studies focused on these topics and reviews covering these fields are also welcome for submission. We look forward to receiving your contributions to outline future directions for the studies on the health effects of exposure to dioxin and its related compounds.

About the Journal

Message from the Editor-in-Chief

Toxics (ISSN 2305-6304) is an international, peer-reviewed, open access journal which provides an advanced forum for studies related to all aspects of toxic chemicals and materials. We aim to publish high quality work that furthers our understanding of the exposure, effects, and risks of chemicals and materials in humans and the natural environment as well as approaches to assess and/or manage the toxicological and ecotoxicological risks of chemicals and materials. Please consider publishing in *Toxics* when preparing your next paper.

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Toxicology) / CiteScore - Q1 (Chemical Health and Safety)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.8 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the second half of 2025).
