Novel Adsorbents and Adsorption Methods for Pollutants Removal

Message from the Guest Editors

This Special Issue will focus on timely highlighting the latest advances in studies on novel adsorbents and adsorption methods for pollutants removal. Topics may include, but are not limited to, synthesis and characterization of novel adsorption materials; mechanism, thermodynamic and kinetic approaches of adsorption; separation, concentration and removal of pollutants including heavy metals, radionuclides and various toxicants; application study of adsorption method to pollutants removal process. Authors are invited and welcome to submit original research papers, reviews, and short communications.
