

## Special Issue

# Biomonitoring of Human Exposure: From Individual to Group Exposure Assessment

### Message from the Guest Editor

We intend to demonstrate that the individual analysis of biomonitoring is a useful tool for personal exposure evaluation, providing information not given by inhalation and dermal exposure assessment. The appropriate utilization of HBM can further highlight personal living and/or working conditions and practices, taking into account individual differences and allowing more individualized measures to prevent exposure by changing individual behavior. Furthermore, HBM can help in identifying unintentional and unexpected exposures. Real-life examples from different occupational and private indoor environments are expected to showcase the benefits of HBM at individual as well as at group levels. Subsequently, the articles in this Special Issue are expected to give advice on the most suitable approaches for choosing the most appropriate biomarker and/or matrix, by showing their respective advantages and limitations.

## About the Journal

### Message from the Editor-in-Chief

*Toxics* (ISSN 2305-6304) is an international, peer-reviewed, open access journal which provides an advanced forum for studies related to all aspects of toxic chemicals and materials. We aim to publish high quality work that furthers our understanding of the exposure, effects, and risks of chemicals and materials in humans and the natural environment as well as approaches to assess and/or manage the toxicological and ecotoxicological risks of chemicals and materials. Please consider publishing in *Toxics* when preparing your next paper.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, AGRIS, and other databases.

#### Journal Rank:

JCR - Q1 (Toxicology) / CiteScore - Q1 (Chemical Health and Safety)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.8 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the second half of 2025).
