

## Special Issue

# Assessment of Novel Environmental Exposure on Humans

### Message from the Guest Editors

New threaten of physical, biological and chemical exposure from the indoor and outdoor environment would influence human health. For examples, persistent organic pollutants, endocrine disruptors, emerging environmental pollution, toxic metals, or drugs in different media are concerned determinants of environmental risk factors. Although the regulations of many legacy contaminants or drugs, like dioxins and DES, the accumulation in the human body would dramatically change; however, new substitutes of the above chemicals have been largely and widely applied in numerous products or re-shaped and distributed into the environment since the early 21 centuries. Meanwhile, factors change (like temperature, green land, radiation, fungi, etc.) by climate change would gradually affect our health. This Special Issue calls for submissions that focus on research investigating associations between new emergency environmental pollutants or important contaminants or drug exposures and human's health, especially through epidemiological, biomonitoring, and novel approaches.

## About the Journal

### Message from the Editor-in-Chief

*Toxics* (ISSN 2305-6304) is an international, peer-reviewed, open access journal which provides an advanced forum for studies related to all aspects of toxic chemicals and materials. We aim to publish high quality work that furthers our understanding of the exposure, effects, and risks of chemicals and materials in humans and the natural environment as well as approaches to assess and/or manage the toxicological and ecotoxicological risks of chemicals and materials. Please consider publishing in *Toxics* when preparing your next paper.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, AGRIS, and other databases.

#### Journal Rank:

JCR - Q1 (Toxicology) / CiteScore - Q1 (Chemical Health and Safety)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.1 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).
