

## Special Issue

# New Technologies to Decontaminate Pollutants in Water

### Message from the Guest Editors

Industrialization is global and the impact on the environment must be monitored and minimized. Water is the most abundant substance on the Earth's surface and one of the most influenced by contamination. Some of the most common pollutants, like pesticides or dyes, have an ionic character and, for this reason, are easily soluble in water sources. The same is true of heavy metal ions and many others. The contribution of the scientific community to the development of easy technologies to decontaminate water is fundamental because every year tons of contaminants are introduced in our lakes, rivers, seas and oceans. We are pleased to invite you to contribute to this Special Issue entitled "New Technologies to Decontaminate Pollutants in Water" with the aim to highlight advances in the field and create an important collection of recent discoveries about environmental chemistry.

## About the Journal

### Message from the Editor-in-Chief

*Toxics* (ISSN 2305-6304) is an international, peer-reviewed, open access journal which provides an advanced forum for studies related to all aspects of toxic chemicals and materials. We aim to publish high quality work that furthers our understanding of the exposure, effects, and risks of chemicals and materials in humans and the natural environment as well as approaches to assess and/or manage the toxicological and ecotoxicological risks of chemicals and materials. Please consider publishing in *Toxics* when preparing your next paper.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, AGRIS, and other databases.

#### Journal Rank:

JCR - Q1 (Toxicology) / CiteScore - Q1 (Chemical Health and Safety)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.1 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).
