

## Special Issue

# Early Childhood Health Effects of Prenatal Exposures in Low and Middle Income Countries

### Message from the Guest Editor

The prenatal period is a sensitive time of development that can influence an individual's health trajectory. Accumulating epidemiologic data from higher income countries demonstrates that exposure to environmental pollutants during the prenatal period can have deleterious health effects in early childhood. Meanwhile, low and middle income countries (LMICs) are disproportionately burdened by environmental pollution, yet too few studies have investigated the health effects of prenatal exposures in LMICs. In this Special Issue, we aim to highlight original research or review articles that specifically address prenatal exposures and early childhood health effects in LMICs. Suggested original research articles conducted among LMIC populations may be exposure assessment studies in the prenatal period or epidemiology studies evaluating prenatal exposures and effects during the postnatal (early childhood) period. A Special Issue on this topic will help reveal recent findings in understudied, vulnerable populations while further identifying key gaps in our understanding of the public health impacts of prenatal exposure to environmental pollutants in LMICs.

## About the Journal

### Message from the Editor-in-Chief

*Toxics* (ISSN 2305-6304) is an international, peer-reviewed, open access journal which provides an advanced forum for studies related to all aspects of toxic chemicals and materials. We aim to publish high quality work that furthers our understanding of the exposure, effects, and risks of chemicals and materials in humans and the natural environment as well as approaches to assess and/or manage the toxicological and ecotoxicological risks of chemicals and materials. Please consider publishing in *Toxics* when preparing your next paper.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, AGRIS, and other databases.

#### Journal Rank:

JCR - Q1 (Toxicology) / CiteScore - Q1 (Chemical Health and Safety)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.1 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).
