Environmental and Human Health Risk Assessment of Emerging Contaminants

Message from the Guest Editor

Emerging contaminants can be defined as natural or synthetic chemicals that are not currently regulated but cause adverse effects on environmental or human health. Use of emerging contaminants might be expanding with the introduction of new commercial items or as alternatives of known existing contaminants. However, the hazard and exposure information of these emerging contaminants remains largely unknown and their related risks were not quantified yet. In this respect, the risk assessment of emerging contaminants provides very crucial information in terms of risk control decisions, chemical management strategies, and prevention of environmental health concerns. Thus, this Special Issue aims to cover a range of topics including hazard characterization of emerging contaminants, environmental or human exposure of emerging contaminants and risk evaluation of emerging contaminants. In addition, the manuscripts introducing new approaches or new theoretical suggestions that support risk assessment and review manuscripts are also included in the scope of this Special Issue.

About the Journal

Message from the Editor-in-Chief

Toxics (ISSN 2305-6304) is an international, peer-reviewed, open access journal which provides an advanced forum for studies related to all aspects of toxic chemicals and materials. We aim to publish high quality work that furthers our understanding of the exposure, effects, and risks of chemicals and materials in humans and the natural environment as well as approaches to assess and/or manage the toxicological and ecotoxicological risks of chemicals and materials. Please consider publishing in *Toxics* when preparing your next paper.

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Toxicology) / CiteScore - Q1 (Chemical Health and Safety)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.1 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).
