

Special Issue

Health Effects of Exposure to Environmental Pollutants—2nd Edition

Message from the Guest Editors

The study of the effects of environmental pollutants on human health has received widespread attention, including whether traditional pollutants such as particulate matter and heavy metals, or new pollutants such as nanoparticles and microplastics, can have a serious impact on the environment and human health. Research into the potential toxic effects and mechanisms of environmental pollutants can provide a scientific basis for related prevention work. The purpose of this Special Issue is to publish research on the potential toxicity and mechanisms of environmental pollutants affecting humans or the environment. We encourage the use of novel methods such as multi-omics techniques or research on new pollutants such as nanomaterials. Research using biomarkers to conduct biological monitoring to assess the impact of environmental or occupational pollutants on human exposure or health is welcomed, as well as reviews summarizing relevant recent advances.

About the Journal

Message from the Editor-in-Chief

Toxics (ISSN 2305-6304) is an international, peer-reviewed, open access journal which provides an advanced forum for studies related to all aspects of toxic chemicals and materials. We aim to publish high quality work that furthers our understanding of the exposure, effects, and risks of chemicals and materials in humans and the natural environment as well as approaches to assess and/or manage the toxicological and ecotoxicological risks of chemicals and materials. Please consider publishing in *Toxics* when preparing your next paper.

Editor-in-Chief

Dr. Demetrio Raldúa

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Toxicology) / CiteScore - Q1 (Chemical Health and Safety)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.8 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the second half of 2025).
