

Special Issue

Advances in Pesticide-Induced Inflammation and Disease

Message from the Guest Editors

We are seeing an increase in the use of pesticides around the world. At the same time, emerging scientific evidence demonstrates the real risks that pesticides pose to human health. Studies have shown that pesticides cause transient or permanent changes in the immune system, particularly its relationship with the inflammatory process. Thus, this Special Issue is dedicated to scientific works that clarify the role of pesticides in inflammatory diseases. These findings could contribute to public policies that aim to guide the use of pesticides and the potential risks for the population.

About the Journal

Message from the Editor-in-Chief

Toxics (ISSN 2305-6304) is an international, peer-reviewed, open access journal which provides an advanced forum for studies related to all aspects of toxic chemicals and materials. We aim to publish high quality work that furthers our understanding of the exposure, effects, and risks of chemicals and materials in humans and the natural environment as well as approaches to assess and/or manage the toxicological and ecotoxicological risks of chemicals and materials. Please consider publishing in *Toxics* when preparing your next paper.

Editor-in-Chief

Dr. Demetrio Raldúa
Department Environmental Chemistry, IDAEA-CSIC, Jordi Girona 18,

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Toxicology) / CiteScore - Q1 (Chemical Health and Safety)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.1 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).
