Risk Assessment of Emerging Contaminants in Aquatic Ecosystems

Message from the Guest Editors

Emerging contaminants (ECs) occur on a global scale and encompass a number of lifestyle compounds. There are 4 major categories of ECs that are of concern worldwide: persistent organic pollutants, endocrine disruptors, antibiotics, and microplastics. These substances have been documented regarding their biotoxicity, environmental persistence, bioaccumulation, and widespread detection in aquatic systems, raising concerns about the possible adverse effects on human health. Thus, the surveillance of ECs and the assessment of the potential risk is pivotally important. This Special Issue aims to better understand the exposure to ECs, the risks such contaminants may pose to human health, and how that information can inform policy and regulation. Areas of interest for this Issue include but are not limited to:

- Occurrence, transport, and fate of ECs in the aquatic environment
- Toxicity of ECs to aquatic organisms
- Exposure and effect assessment of ECs for human health
- Studies assessing health effects of real-world exposure to ECs
- Combined toxicity of ECs
- Quantitative structure–activity relationships (QSARs) of ECs

About the Journal

Message from the Editor-in-Chief

Toxics (ISSN 2305-6304) is an international, peer-reviewed, open access journal which provides an advanced forum for studies related to all aspects of toxic chemicals and materials. We aim to publish high quality work that furthers our understanding of the exposure, effects, and risks of chemicals and materials in humans and the natural environment as well as approaches to assess and/or manage the toxicological and ecotoxicological risks of chemicals and materials. Please consider publishing in *Toxics* when preparing your next paper.

Editor-in-Chief

Dr. Demetrio Raldúa
Department Environmental Chemistry, IDAEA-CSIC, Jordi Girona 18,

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Toxicology) / CiteScore - Q1 (Chemical Health and Safety)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.8 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the second half of 2025).
