New Insights into Forensic Toxicology

Message from the Guest Editors

Forensic toxicology is a rapidly developing scientific field that covers clinical toxicology, forensic medicine and forensic analytics. With the development of the chemical and IT industries, new psychoactive substances appear on the black market every year, some of which pose a real threat to human life. In response to these concerns, modern forensic toxicology must employ advanced analytical instrumentation, such as GC-MS, LC-MS, ICP-MS, as well as seeking new research methods. The determination of both chemical weapons and metabolites, as well as degradation products of compounds such as novichok, is also becoming a challenge for the modern world in the light of war. The scope of this Special Issue is broad, encompassing forensic toxicology, including synthetic and natural poisons; development and application of novel analytical methods; interpretation of forensic toxicological data; new psychoactive substances and conventional illicit drugs; driving under the influence of drugs and alcohol; the latest advances in biomarker-related research; and markers of necrochemical diagnostics.

About the Journal

Message from the Editor-in-Chief

Toxics (ISSN 2305-6304) is an international, peer-reviewed, open access journal which provides an advanced forum for studies related to all aspects of toxic chemicals and materials. We aim to publish high quality work that furthers our understanding of the exposure, effects, and risks of chemicals and materials in humans and the natural environment as well as approaches to assess and/or manage the toxicological and ecotoxicological risks of chemicals and materials. Please consider publishing in *Toxics* when preparing your next paper.

Editor-in-Chief

Dr. Demetrio Raldúa

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Toxicology) / CiteScore - Q1 (Chemical Health and Safety)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.8 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the second half of 2025).
