

Special Issue

Water-Soil Pollution and Resource Utilization

Message from the Guest Editors

The scope of this research topic is to discuss the migration and transformation characteristics (or mechanisms) of industrial and agricultural pollutants in soil and water, as well as conduct a risk assessment of these pollutants. It will also include theories of water-soil pollution control, remediation methods, and improved governance technologies. The areas covered by this research topic may include, but are not limited to, the following: (1) Migration and transformation of pollutants in "water-soil-plant"; (2) Water-soil risk assessment; (3) Water-soil treatment and remediation technology; (4) Advanced oxidation; (5) Membrane separation; (6) Resource utilization; (7) Toxins and toxicology; (8) Food safety.

About the Journal

Message from the Editor-in-Chief

Toxics (ISSN 2305-6304) is an international, peer-reviewed, open access journal which provides an advanced forum for studies related to all aspects of toxic chemicals and materials. We aim to publish high quality work that furthers our understanding of the exposure, effects, and risks of chemicals and materials in humans and the natural environment as well as approaches to assess and/or manage the toxicological and ecotoxicological risks of chemicals and materials. Please consider publishing in *Toxics* when preparing your next paper.

Editor-in-Chief

Dr. Demetrio Raldúa

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Toxicology) / CiteScore - Q1 (Chemical Health and Safety)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.1 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).
