

## Special Issue

# Environmental Contaminant Exposure and Intake from Agricultural Products

### Message from the Guest Editors

Environmental contaminant bioaccumulation in agricultural products is an issue of great concern due to the high consumption of this food category; in fact, plant-based diets are highly promoted as they have several beneficial effects on health. Hence, assessing the exposure and intake of environmental contaminants through the consumption of agricultural products are a priority to ensure food safety and human health.

Agricultural products are also intended for livestock feed; therefore, studying the feed contamination and animal exposure is also an essential condition to safeguard both human and animal health. This Special Issue focuses on the study of environmental contaminant exposure and intake from agricultural products. In this regard, original research articles, short communications, and reviews are welcome and may include, but are not limited to, the following topics: persistent organic pollutants (POPs); endocrine disruptors; emerging contaminants; metals and metalloids; novel analytical methods; targeted and untargeted analyses; food safety; feed safety; risk assessment; and exposure models.

## About the Journal

### Message from the Editor-in-Chief

*Toxics* (ISSN 2305-6304) is an international, peer-reviewed, open access journal which provides an advanced forum for studies related to all aspects of toxic chemicals and materials. We aim to publish high quality work that furthers our understanding of the exposure, effects, and risks of chemicals and materials in humans and the natural environment as well as approaches to assess and/or manage the toxicological and ecotoxicological risks of chemicals and materials. Please consider publishing in *Toxics* when preparing your next paper.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, AGRIS, and other databases.

#### Journal Rank:

JCR - Q1 (Toxicology) / CiteScore - Q1 (Chemical Health and Safety)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.8 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the second half of 2025).
