

## Special Issue

# Air Pollution Monitoring and Epidemiology

### Message from the Guest Editor

This Special Issue explores advancements in air pollution monitoring technologies and their applications in epidemiology, analysing the associations between pollutant exposure and health outcomes such as respiratory and cardiovascular diseases. By combining real-time monitoring data, remote sensing technologies, and large-scale population cohort studies, researchers can more accurately assess the health risks of pollutants and provide scientific evidence for public health policymaking.

## About the Journal

### Message from the Editor-in-Chief

*Toxics* (ISSN 2305-6304) is an international, peer-reviewed, open access journal which provides an advanced forum for studies related to all aspects of toxic chemicals and materials. We aim to publish high quality work that furthers our understanding of the exposure, effects, and risks of chemicals and materials in humans and the natural environment as well as approaches to assess and/or manage the toxicological and ecotoxicological risks of chemicals and materials. Please consider publishing in *Toxics* when preparing your next paper.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, AGRIS, and other databases.

#### Journal Rank:

JCR - Q1 (Toxicology) / CiteScore - Q1 (Chemical Health and Safety)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.8 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the second half of 2025).
