

## Special Issue

# Feature Papers in the Novel Methods in Toxicology Research

### Message from the Guest Editor

This Special Issue encourages innovative, multidisciplinary research in the field of predictive toxicology, with a focus on promoting the use of New Approach Methodologies (NAMs) to predict hazards. This series of articles will aim to enhance innovative human and environmental health-based approaches that will allow progress towards more predictive hazard assessments while embracing replacement, reduction, and refinement. This Special Issue welcomes original research articles as well as reviews and short communications related to any aspect of NAMs, including (but not limited to) in vitro, in silico, and computational and AI approaches, as well as gaps, challenges, and regulatory acceptance.

## About the Journal

### Message from the Editor-in-Chief

*Toxics* (ISSN 2305-6304) is an international, peer-reviewed, open access journal which provides an advanced forum for studies related to all aspects of toxic chemicals and materials. We aim to publish high quality work that furthers our understanding of the exposure, effects, and risks of chemicals and materials in humans and the natural environment as well as approaches to assess and/or manage the toxicological and ecotoxicological risks of chemicals and materials. Please consider publishing in *Toxics* when preparing your next paper.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, AGRIS, and other databases.

#### Journal Rank:

JCR - Q1 (Toxicology) / CiteScore - Q1 (Chemical Health and Safety)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.1 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).
