Environmental Exposure to Metals and Human Health

Message from the Guest Editors

Exposure to metals and metalloids (here, “metals”) is a public health concern. Pregnant women, infants, and children might be particularly vulnerable to the effects of environmental exposure to metals, which may cause lifelong health effects. Yet, limited data exist on the health effects of exposure to metal mixtures. Ingestion of metals from food or water is one of the primary sources of joint exposure to metals, besides inhalation and dermal contact. Existing analytical techniques are capable to measure metal concentrations in biological samples and are commonly used as a proxy of metals exposure. This Special Issue aims to better understand the pathways of exposure, the validity of metal exposure biomarkers, the health risks associated with exposure to metal mixtures, and interventions to reduce harmful aggregate exposures. Studies focused on vulnerable subpopulations will be prioritized. For this Special Issue, original research articles and reviews are welcome. We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

Toxics (ISSN 2305-6304) is an international, peer-reviewed, open access journal which provides an advanced forum for studies related to all aspects of toxic chemicals and materials. We aim to publish high quality work that furthers our understanding of the exposure, effects, and risks of chemicals and materials in humans and the natural environment as well as approaches to assess and/or manage the toxicological and ecotoxicological risks of chemicals and materials. Please consider publishing in *Toxics* when preparing your next paper.

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Toxicology) / CiteScore - Q1 (Chemical Health and Safety)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.1 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).
