

Special Issue

Pregnancy and Lactation Period Exposure to Environmental Toxicants and the Effects on Maternal and Child Health

Message from the Guest Editors

The issue particularly welcomes contributions that employ advanced methodologies, including multi-omics approaches, network toxicology, computational modeling, and innovative risk assessment frameworks, to inform policy development for reducing pregnancy and lactation period exposure risks. Emphasis is placed on translating scientific findings into actionable strategies for safeguarding maternal and child health, with the overarching goal of advancing interdisciplinary approaches to address this critical global public health challenge.

About the Journal

Message from the Editor-in-Chief

Toxics (ISSN 2305-6304) is an international, peer-reviewed, open access journal which provides an advanced forum for studies related to all aspects of toxic chemicals and materials. We aim to publish high quality work that furthers our understanding of the exposure, effects, and risks of chemicals and materials in humans and the natural environment as well as approaches to assess and/or manage the toxicological and ecotoxicological risks of chemicals and materials. Please consider publishing in *Toxics* when preparing your next paper.

Editor-in-Chief

Dr. Demetrio Raldúa

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Toxicology) / CiteScore - Q1 (Chemical Health and Safety)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.1 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).
