

## Special Issue

# Ecotoxicity Induced by Pesticides Exposure Volume II

### Message from the Guest Editor

In the last few decades, pesticides have played an irreplaceable role in agricultural practice for controlling pests and increasing crop yield and quality. However, the inefficient and extensive use of pesticides inadvertently results in environmental pollution and produces toxic effects in non-target organisms and on human health. Therefore, thoroughly understanding the environmental behavior and potential ecotoxicity of pesticide exposure are vitally important for pesticides' environmental safety and scientific application. Moreover, the development of new or systematic pesticide exposure risk assessment methods is also crucial for the clarification/analysis of the risk of pesticides in complex real-world environments. This Special Issue on "Ecotoxicity Induced by Pesticides Exposure Volume II" aims to gather studies covering various aspects of this topic, and we encourage scientists around the world to contribute original research papers and reviews dealing with the ecotoxicity and risk assessment of pesticide exposure.

## About the Journal

### Message from the Editor-in-Chief

*Toxics* (ISSN 2305-6304) is an international, peer-reviewed, open access journal which provides an advanced forum for studies related to all aspects of toxic chemicals and materials. We aim to publish high quality work that furthers our understanding of the exposure, effects, and risks of chemicals and materials in humans and the natural environment as well as approaches to assess and/or manage the toxicological and ecotoxicological risks of chemicals and materials. Please consider publishing in *Toxics* when preparing your next paper.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, AGRIS, and other databases.

#### Journal Rank:

JCR - Q1 (Toxicology) / CiteScore - Q1 (Chemical Health and Safety)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.8 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the second half of 2025).
