

## Special Issue

# Environmental Carcinogens Exposure: Molecular Mechanisms, Genotoxicity and Prevention Strategies

### Message from the Guest Editors

Environmental pollutants, including natural and anthropogenic substances such as air pollutants, food and soil contaminants, radiation and chemicals present in the environment constitute a grave threat to human health. The World Health Organization (WHO) estimated that environmental risks contribute to around 20% of the cancer burden worldwide. Since 1971, the International Agency for Research on Cancer (IARC) of the World Health Organization (WHO) has evaluated more than 1000 agents using IARC monographs, and more than 500 have been classified as carcinogenic (Group 1), probably carcinogenic (Group 2A) or possibly carcinogenic (Group 2B) to. This Special Issue of *Toxics* focuses on the genotoxicity and prevention strategies associated with exposure to carcinogens in the environment. Original research, reviews, meta-analyses, short communications, and commentaries covering the aforementioned topics are welcome and expected to add relevant information to the current knowledge.

## About the Journal

### Message from the Editor-in-Chief

*Toxics* (ISSN 2305-6304) is an international, peer-reviewed, open access journal which provides an advanced forum for studies related to all aspects of toxic chemicals and materials. We aim to publish high quality work that furthers our understanding of the exposure, effects, and risks of chemicals and materials in humans and the natural environment as well as approaches to assess and/or manage the toxicological and ecotoxicological risks of chemicals and materials. Please consider publishing in *Toxics* when preparing your next paper.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, AGRIS, and other databases.

#### Journal Rank:

JCR - Q1 (Toxicology) / CiteScore - Q1 (Chemical Health and Safety)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.1 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).
