

Special Issue

Transformation Mechanism and Environmental Effect of Emerging Pollutants

Message from the Guest Editors

This Special Issue especially welcomes the submission of contributions utilizing advanced methodologies, such as multi-omics approaches, network toxicology, computational modeling, and innovative risk assessment frameworks, to elucidate transformation pathways and environmental effects. Furthermore, considering the potential negative impacts of these pollutants on human health, we also strongly encourage related *in vitro*, *in vivo*, and epidemiological studies to be submitted. Specifically, studies that explore the interactions between emerging pollutants and biological systems across different levels—from molecular to population—are of particular interest.

Guest Editors

Dr. How-Ran Chao

About the Journal

Message from the Editor-in-Chief

Toxics (ISSN 2305-6304) is an international, peer-reviewed, open access journal which provides an advanced forum for studies related to all aspects of toxic chemicals and materials. We aim to publish high quality work that furthers our understanding of the exposure, effects, and risks of chemicals and materials in humans and the natural environment as well as approaches to assess and/or manage the toxicological and ecotoxicological risks of chemicals and materials. Please consider publishing in *Toxics* when preparing your next paper.

Editor-in-Chief

Dr. Demetrio Raldúa
Department Environmental Chemistry, IDAEA-CSIC, Jordi Girona 18,
08034 Barcelona, Spain

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Toxicology) / CiteScore - Q1 (Chemical Health and Safety)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.8 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the second half of 2025).
