

Special Issue

Analysis of the Sources and Components of Aerosols in Air Pollution

Message from the Guest Editor

This Special Issue delves into a series of topics related to the chemical composition of particulate matter from different atmospheric sources. It includes water-soluble ions, heavy metals, and organic compounds, with a particular emphasis on tracer substances as indicators to facilitate analysis of the sources of these particles. We also pay attention to the ecological and environmental effects of atmospheric particulate matter, including mechanisms of toxicity, metabolism, ecological impacts, risk assessment, and global climate change. Welcome scholars who are interested to submit your work.

About the Journal

Message from the Editor-in-Chief

Toxics (ISSN 2305-6304) is an international, peer-reviewed, open access journal which provides an advanced forum for studies related to all aspects of toxic chemicals and materials. We aim to publish high quality work that furthers our understanding of the exposure, effects, and risks of chemicals and materials in humans and the natural environment as well as approaches to assess and/or manage the toxicological and ecotoxicological risks of chemicals and materials. Please consider publishing in *Toxics* when preparing your next paper.

Editor-in-Chief

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Toxicology) / CiteScore - Q1 (Chemical Health and Safety)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.1 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).
