## Ecological Risk of Contaminants of Emerging Concerns: Environmental Toxicity of Chemical Mixtures

### Message from the Guest Editors

The pollution of the environment and especially of aquatic environments is a major research topic. Environmental contaminants penetrate and spread through trophic chains, causing harmful effects both during development (as in larvae and fry) and in the adult phase. The number of new environmental contaminants relevant to aquatic environments is constantly increasing. Moreover, their ability to cause toxic effects in combination with other pollutants also poses a real threat to human health. In particular, we call for review articles and original research that pay attention to the effects of emerging contaminants on marine organisms and the combined effects that several contaminants together may cause and the pathways which are involved.

## About the Journal

### Message from the Editor-in-Chief

*Toxics* (ISSN 2305-6304) is an international, peer-reviewed, open access journal which provides an advanced forum for studies related to all aspects of toxic chemicals and materials. We aim to publish high quality work that furthers our understanding of the exposure, effects, and risks of chemicals and materials in humans and the natural environment as well as approaches to assess and/or manage the toxicological and ecotoxicological risks of chemicals and materials. Please consider publishing in *Toxics* when preparing your next paper.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, AGRIS, and other databases.

#### Journal Rank:

JCR - Q1 (Toxicology) / CiteScore - Q1 (Chemical Health and Safety)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.8 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the second half of 2025).
