

## Special Issue

# Environmental Exposures on Male and Female Fertility in the Maximum Reproductive Age

### Message from the Guest Editors

The growing interest in the transgenerational effects induced by pollution on gametes shifts the interest in prevention as far as preconception. This approach appears very promising, above all in young people (maximum fertile age: 18–35 years), considering the possibility of reducing noncommunicable diseases in future adults and generations. In this context, the safeguarding of germ cells is a new challenge to reduce the burden of epigenetically transmitted diseases. This Special Issue intends to present the current research on the association between environmental exposure and fertility with a view to safeguarding not only reproductive but general health, in order to collect indications and measures for prevention, resilience, and health risk management. Authors are kindly invited to submit original research papers, reviews, and short communications.

### Guest Editors

Dr. Luigi Montano

1. Andrology Unit and Service of Lifestyle Medicine in UroAndrology, Local Health Authority (ASL) Salerno, Coordination Unit of the Network for Environmental and Reproductive Health (EcoFoodFertility Project), "S Francis Hospital", Oliveto Citra, 84020 Salerno, Italy  
2. PhD Program in Evolutionary Biology and Ecology, University of Rome "Tor Vergata", Rome, Italy

Dr. Antonino Guglielmino

Unit of Reproductive Medicine (UMR), 95030 Catania, Italy

Dr. Paola Viganò

Infertility Unit, Fondazione IRCCS Ca' Granda Ospedale Maggiore Policlinico di Milano, Milano, Italy

### Deadline for manuscript submissions

closed (31 December 2023)

## About the Journal

### Message from the Editor-in-Chief

*Toxics* (ISSN 2305-6304) is an international, peer-reviewed, open access journal which provides an advanced forum for studies related to all aspects of toxic chemicals and materials. We aim to publish high quality work that furthers our understanding of the exposure, effects, and risks of chemicals and materials in humans and the natural environment as well as approaches to assess and/or manage the toxicological and ecotoxicological risks of chemicals and materials. Please consider publishing in *Toxics* when preparing your next paper.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPPlus / SciFinder, AGRIS, and other databases.

#### Journal Rank:

JCR - Q1 (Toxicology) / CiteScore - Q1 (Chemical Health and Safety)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.1 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).
