Effects of Environmental Contaminants on Animals: Toxicity and Molecular Mechanisms

Message from the Guest Editors

Toxic environmental contaminants caused by human activities have brought potential threats to human and animal health, which has attracted worldwide attention. This is one of the most active research fields today. In this Special Issue, our aim is to provide an in-depth view of the "Effects of Environmental Contaminants on Animals: Toxicity and Molecular Mechanisms in Toxics". We welcome high-quality original research and review articles focusing on molecular mechanism of animal poisoning caused by toxic environmental pollutants via soliciting manuscripts (such as original research and review articles) which focus on animals, toxicity, and molecular mechanism. We hope that the information gathered from this Special Issue will reflect the latest progress in the research of animal poisoning caused by toxic environmental pollutants, as well as provide some novel and in-depth findings on toxics. About the Journal

Message from the Editor-in-Chief

Toxics (ISSN 2305-6304) is an international, peer-reviewed, open access journal which provides an advanced forum for studies related to all aspects of toxic chemicals and materials. We aim to publish high quality work that furthers our understanding of the exposure, effects, and risks of chemicals and materials in humans and the natural environment as well as approaches to assess and/or manage the toxicological and ecotoxicological risks of chemicals and materials. Please consider publishing in *Toxics* when preparing your next paper.

Editor-in-Chief

Dr. Demetrio Raldúa

Department Environmental Chemistry, IDAEA-CSIC, Jordi Girona 18,

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Toxicology) / CiteScore - Q1 (Chemical Health and Safety)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.3 days after submission; acceptance to publication is undertaken in 2.3 days (median values for papers published in this journal in the second half of 2024).
