Environmental Pollutants, Neurocognitive Disorders and Other Health Outcomes in Autochthonous Populations Worldwide

Message from the Guest Editors

The Special Issue "*Environmental Pollutants, Neurocognitive Disorders and Other Health Outcomes in Autochthonous Populations Worldwide*" aims to identify ongoing research devoted to exploring and debating the current findings about neurocognitive disorders due to exposure to environmental pollutants, focusing on, but not restricted to, the harmful effects of mercury poisoning from gold mining activities, especially under indigenous and traditional populations worldwide. The topic of global pollutants has gained great visibility on the public health agenda in recent times. Catastrophes such as the Minamata Disaster, the Iraq grain poisoning, and Burkina Faso gold mining pollution have spread several health problems related to mercury contamination to the affected communities. The aluminum toxic spill in Hungary, the Exxon Valdez and Deepwater Horizon oil spill in the USA, lead poisoning in the Dominican Republic, the Bhopal gas tragedy in India, toxic waste dumping in Ivory Coast, and the Dioxin disaster in Seveso, Italy are emblematic examples of the problems related to this Special Issue.

About the Journal

Message from the Editor-in-Chief

Toxics (ISSN 2305-6304) is an international, peer-reviewed, open access journal which provides an advanced forum for studies related to all aspects of toxic chemicals and materials. We aim to publish high quality work that furthers our understanding of the exposure, effects, and risks of chemicals and materials in humans and the natural environment as well as approaches to assess and/or manage the toxicological and ecotoxicological risks of chemicals and materials. Please consider publishing in *Toxics* when preparing your next paper.

Editor-in-Chief

Dr. Demetrio Raldúa

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Toxicology) / CiteScore - Q1 (Chemical Health and Safety)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.1 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).
