Special Issue

Health Risk and Toxicity Mechanism of Nanoparticles or Ultrafine Particles Inhalation

Message from the Guest Editors

The application of nanomaterials is experiencing unprecedented expansion in the 21st century. Nanoparticle pollution is becoming an emerging pollution issue. Besides ultrafine particulate matter, are other sources of nanopollution. Long-term inhalation exposure to these nanoparticles or ultrafine particles may cause serious damage to the respiratory tract and increase the incidence rate of pulmonary diseases, cardiovascular diseases, and premature death. Therefore, the health risk and toxicity mechanism of nanoparticles or ultrafine particle inhalation is an essential topic to understand the toxic effect of these nanoparticles on human health. For this Special Issue on "Health Risk and Toxicity Mechanism of Nanoparticles or Ultrafine Particles Inhalation", original research articles, reviews, and short communications are welcome. Research areas may include (but are not limited to) public health, environmental chemistry, and toxicology. We also encourage manuscripts that propose new concepts and techniques to evaluate the health effect of nanoparticles.

About the Journal

Message from the Editor-in-Chief

Toxics (ISSN 2305-6304) is an international, peer-reviewed, open access journal which provides an advanced forum for studies related to all aspects of toxic chemicals and materials. We aim to publish high quality work that furthers our understanding of the exposure, effects, and risks of chemicals and materials in humans and the natural environment as well as approaches to assess and/or manage the toxicological and ecotoxicological risks of chemicals and materials. Please consider publishing in *Toxics* when preparing your next paper.

Editor-in-Chief

Dr. Demetrio Raldúa
Department Environmental Chemistry, IDAEA-CSIC, Jordi Girona 18, 08034 Barcelona, Spain

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Toxicology) / CiteScore - Q1 (Chemical Health and Safety)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.1 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).
