

## Special Issue

# Chemical and Biological Threats, Hazard Potential and Countermeasures

### Message from the Guest Editors

We have issued the Special Issue of *Toxics* entitled, “Chemical and biological threats, hazard potential and countermeasures”. In this special issue we would like to pay attention to various aspects of toxicology specifically focused on the chemical and biological threats, which may accidentally or on purpose endanger human health. Besides the characterization of such threats and their biological consequences we will focus on the available and novel experimental countermeasures capable to protect from and/or threat such exposures. We would like to encourage our colleagues from this field for the submission of review or original research articles that encompasses this field at different levels including chemical, biological, medical and epidemiological approaches.

## About the Journal

### Message from the Editor-in-Chief

*Toxics* (ISSN 2305-6304) is an international, peer-reviewed, open access journal which provides an advanced forum for studies related to all aspects of toxic chemicals and materials. We aim to publish high quality work that furthers our understanding of the exposure, effects, and risks of chemicals and materials in humans and the natural environment as well as approaches to assess and/or manage the toxicological and ecotoxicological risks of chemicals and materials. Please consider publishing in *Toxics* when preparing your next paper.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, AGRIS, and other databases.

#### Journal Rank:

JCR - Q1 (Toxicology) / CiteScore - Q1 (Chemical Health and Safety)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.1 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).
