

## Special Issue

# Fate and Transport of Contaminants in Soil and Groundwater Systems

### Message from the Guest Editors

The availability, quality, and quantity of water resources are going to be one of the most important problems that humankind has to face in the decades to come. In that context, human activities (urban, industrial, and/or agriculture) may release a growing amount of new substances into the environment, and put soils and both surface and groundwater resources at risk. This Special Issue wants to capture attention of this problem, and is devoted to new studies dealing with presence, behaviour, final fate, modeling, and/or remediation of contaminants in soil and groundwater systems. The scope of this Special Issue embraces a range of topics, including experimental investigations of contaminant sorption, degradation processes, diffusion, contaminant decay, transport in the unsaturated, and saturated zones; field experiments and new techniques of soil restoration; and new tools and strategies to monitor soils and groundwater pollution. Dr. Carmen Corada-Fernández

## About the Journal

### Message from the Editor-in-Chief

*Toxics* (ISSN 2305-6304) is an international, peer-reviewed, open access journal which provides an advanced forum for studies related to all aspects of toxic chemicals and materials. We aim to publish high quality work that furthers our understanding of the exposure, effects, and risks of chemicals and materials in humans and the natural environment as well as approaches to assess and/or manage the toxicological and ecotoxicological risks of chemicals and materials. Please consider publishing in *Toxics* when preparing your next paper.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, AGRIS, and other databases.

#### Journal Rank:

JCR - Q1 (Toxicology) / CiteScore - Q1 (Chemical Health and Safety)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2026).
