

Special Issue

Genotoxicity of Environmental Contaminants

Message from the Guest Editor

Environmental contaminants have been closely linked to the development of various diseases and are the cause of tremendous public concern. Numerous types of contaminants, including heavy metals and organic pollutants, have been classified as Group I carcinogenic agents by the International Agency for Research on Cancer (IARC), demonstrating the important role of genotoxicity in the risk assessment of environmental contaminants. This Special Issue intends to address cutting-edge research regarding the genotoxicity of environmental contaminants. Potential topics include, but are not limited to, the genetic and epigenetic toxicity of contaminants to humans and the ecosystem and the genotoxicity and related mechanisms of emerging contaminants. We also welcome studies regarding newly developed technologies for the evaluation of the genotoxicity of contaminants and advanced approaches in the prevention and detoxification of environmental-contaminant-induced genotoxicity.

About the Journal

Message from the Editor-in-Chief

Toxics (ISSN 2305-6304) is an international, peer-reviewed, open access journal which provides an advanced forum for studies related to all aspects of toxic chemicals and materials. We aim to publish high quality work that furthers our understanding of the exposure, effects, and risks of chemicals and materials in humans and the natural environment as well as approaches to assess and/or manage the toxicological and ecotoxicological risks of chemicals and materials. Please consider publishing in *Toxics* when preparing your next paper.

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Toxicology) / CiteScore - Q1 (Chemical Health and Safety)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.1 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).
