

Special Issue

Adverse Health Effects of Persistent Environmental Toxicants

Message from the Guest Editor

The importance of the environment in human or animal health has long been known. Environmental toxicants such as metals, metalloids and PCBs, that persist in the environment for years tend to be especially harmful. This special issue in *Toxics* will focus on persistent environmental toxicants known to cause significant adverse human or animal health effects. Studies that use a physiologically or environmentally relevant dose or exposure level of environmentally persistent toxicants are welcome for submission. Both in vivo and in vitro studies are encouraged.

About the Journal

Message from the Editor-in-Chief

Toxics (ISSN 2305-6304) is an international, peer-reviewed, open access journal which provides an advanced forum for studies related to all aspects of toxic chemicals and materials. We aim to publish high quality work that furthers our understanding of the exposure, effects, and risks of chemicals and materials in humans and the natural environment as well as approaches to assess and/or manage the toxicological and ecotoxicological risks of chemicals and materials. Please consider publishing in *Toxics* when preparing your next paper.

Editor-in-Chief

Dr. Demetrio Raldúa

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Toxicology) / CiteScore - Q1 (Chemical Health and Safety)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.8 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the second half of 2025).
