

Special Issue

Statistical Assessment, Modeling, and Mitigation of Water and Soil Pollution

Message from the Guest Editor

We are pleased to invite you to submit the research that aims to respond to the following questions: (1) Statistical assessments can realistically meet ecological risk analyses for different environmental systems, including sources and receptors from drinking water, wastewater, or contaminated soil? (2) To what extent different levels of environmental systems screening could be quantified and correlated with the risks generated in-situ by pollutants/contaminants, including metallic species, biocides, pesticides, and plastics, and whether bioassays can support projected risk-taking. In this Special Issue, original research articles, short communications, and reviews are welcome. We look forward to receiving your contributions. Please click [here](#) for more information.

About the Journal

Message from the Editor-in-Chief

Toxics (ISSN 2305-6304) is an international, peer-reviewed, open access journal which provides an advanced forum for studies related to all aspects of toxic chemicals and materials. We aim to publish high quality work that furthers our understanding of the exposure, effects, and risks of chemicals and materials in humans and the natural environment as well as approaches to assess and/or manage the toxicological and ecotoxicological risks of chemicals and materials. Please consider publishing in *Toxics* when preparing your next paper.

Editor-in-Chief

Dr. Demetrio Raldúa

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Toxicology) / CiteScore - Q1 (Chemical Health and Safety)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.1 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).
