

Special Issue

Analysis of Toxic Elements in Tobacco Product Smoke and Aerosols and Assessment of Health Risks from Chronic Inhalation

Message from the Guest Editor

We are pleased to invite you to submit manuscripts for a Special Issue of *Toxics* on the toxicology and assessment of health risks from chronic inhalation of emissions from tobacco products, including well-validated methodologies and results of clean sample collection and elemental analysis of smoke from combustible tobacco products, “heat, not burn” products, or aerosol from electronic nicotine delivery systems (electronic cigarettes or ENDS) that provide data for toxicological and health risk assessments.

For this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following: toxicology, health risk assessments related to the chronic inhalation exposures to inorganic particles and substances transported in tobacco product emissions, and well-validated sample collection and analytical methodology for the production of biomonitoring and product data in support of toxicological and health risk assessments.

We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

Toxics (ISSN 2305-6304) is an international, peer-reviewed, open access journal which provides an advanced forum for studies related to all aspects of toxic chemicals and materials. We aim to publish high quality work that furthers our understanding of the exposure, effects, and risks of chemicals and materials in humans and the natural environment as well as approaches to assess and/or manage the toxicological and ecotoxicological risks of chemicals and materials. Please consider publishing in *Toxics* when preparing your next paper.

Editor-in-Chief

Dr. Demetrio Raldúa

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Toxicology) / CiteScore - Q1 (Chemical Health and Safety)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.8 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the second half of 2025).
