submissions:

**30 September 2023**

### Message from the Guest Editors

Dear Colleagues,

Mycotoxin contamination of food and feed represents a serious threat to public welfare, posing a health concern regarding consumption. This global food safety issue requires appropriate and objective scientific evidence for decision-making regarding food contaminants, emphasizing the need for proper health risk assessments, including accurate occurrence data and reliable overall food toxicology investigations, in order to protect both public health and global economic trade.

The toxicology of a large number of mycotoxins is still unknown, and understanding the mechanisms of action of mycotoxins at a comprehensive level from a holistic perspective is crucial. Accordingly, the aim of this Special Issue is to gather both original research papers and review articles addressing the health effects induced by individual and combined mycotoxins, exploring the underlying mechanisms and modes of action, providing new analytical solutions for multiple mycotoxins' determination, proposing innovative methodological works, and revealing new insights in the research area. We welcome your contribution.

## Message from the Editor-in-Chief

Toxinology is an incredibly diverse area of study, ranging from field surveys of environmental toxins to the study of toxin action at the molecular level. The editorial board and staff of *Toxins* are dedicated to providing a timely, peer-reviewed outlet for exciting, innovative primary research articles and concise, informative reviews from investigators in the myriad of disciplines contributing to our knowledge on toxins. We are committed to meeting the needs of the toxin research community by offering useful and timely reviews of all manuscripts submitted. Please consider *Toxins* when submitting your work for publication.

## Author Benefits

**Open Access:**— free for readers, with **article processing charges (APC)** paid by authors or their institutions.

**High Visibility:** indexed within **Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPus / SciFinder, AGRIS, and other databases.**

**Journal Rank:** **JCR - Q1 (*Toxicology*) / CiteScore - Q1 (*Health, Toxicology and Mutagenesis*)**
