Message from the Guest Editors

Dear Colleagues,

In recent years, bacterial and plant toxins have been leveraged for the elimination of unwanted cells by linkage to specific antibody carriers to form immunotoxins. These potent and specific cytotoxic agents provide a promising approach to human therapy. In this special issue, we will discuss their basic biology, some of the limitations of their use as therapeutic agents, and special considerations regarding their delivery.

Message from the Editor-in-Chief

Toxinology is an incredibly diverse area of study, ranging from field surveys of environmental toxins to the study of toxin action at the molecular level. The editorial board and staff of *Toxins* are dedicated to providing a timely, peer-reviewed outlet for exciting, innovative primary research articles and concise, informative reviews from investigators in the myriad of disciplines contributing to our knowledge on toxins. We are committed to meeting the needs of the toxin research community by offering useful and timely reviews of all manuscripts submitted. Please consider *Toxins* when submitting your work for publication.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus**, **SCIE (Web of Science)**, **PubMed**, **MEDLINE**, **PMC**, **Embase**, **CAPLus / SciFinder**, **AGRIS**, and **other databases**.

Journal Rank: **JCR - Q1 (Toxicology) / CiteScore - Q1 (Toxicology)**
