Message from the Guest Editor

A major portion of feedstuffs is naturally contaminated with multiple mycotoxins at various levels. Ingestion of feeds contaminated with mycotoxins can affect the growth and health of animals depending on the combination of mycotoxins, their contamination levels, and duration of exposure. Feed producers and animal producers manage mycotoxin contamination by following governmental restrictions or guidelines for certain mycotoxins. However, chronic exposure to multiple mycotoxins can still affect the growth and health of animals even at low levels below the regulatory or guidance levels. This Special Issue will include original research papers investigating the impact of naturally contaminated mycotoxins in feedstuffs and feeds at various levels and combinations on growth of health of animals. The collective efforts on this topic would deepen our understanding of how to handle mycotoxins at practical levels.

Message from the Editor-in-Chief

Toxinology is an incredibly diverse area of study, ranging from field surveys of environmental toxins to the study of toxin action at the molecular level. The editorial board and staff of *Toxins* are dedicated to providing a timely, peer-reviewed outlet for exciting, innovative primary research articles and concise, informative reviews from investigators in the myriad of disciplines contributing to our knowledge on toxins. We are committed to meeting the needs of the toxin research community by offering useful and timely reviews of all manuscripts submitted. Please consider *Toxins* when submitting your work for publication.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, AGRIS, and other databases.**

Journal Rank: JCR - Q1 (*Toxicology*) / CiteScore - Q1 (*Toxicology*)
