

Special Issue

Advances in the Treatment of Movement Disorders with Botulinum Toxins

Message from the Guest Editors

We have the great honor of editing a Special Issue of the journal *Toxins*, entitled "Advances in the Treatment of Dystonia with Botulinum Toxins". In addition to articles devoted to classic, approved indications of botulinum toxin injections, we aim to collect high-quality articles about poorly explored, although common, conditions such as dystonic tremor or functional dystonia, as well as rare, unapproved indications including task-specific and oromandibular dystonia. We will pay close attention to work aimed at better understanding the duration of efficacy from injections and ways to optimize the results of this treatment. This issue will also cover advances in terms of injection techniques or dose selection. Lastly, work dedicated to new forms of toxins will be welcome. We want to make this issue particularly diverse and innovative, with the objectives of attracting the interest of as many people as possible and also creating vocations among young colleagues at a time when other fields of neurology are proving increasingly attractive. Now, pick up your pens and surprise us!

About the Journal

Message from the Editor-in-Chief

Toxinology is an incredibly diverse area of study, ranging from field surveys of environmental toxins to the study of toxin action at the molecular level. The editorial board and staff of *Toxins* are dedicated to providing a timely, peer-reviewed outlet for exciting, innovative primary research articles and concise, informative reviews from investigators in the myriad of disciplines contributing to our knowledge on toxins. We are committed to meeting the needs of the toxin research community by offering useful and timely reviews of all manuscripts submitted. Please consider *Toxins* when submitting your work for publication.

Editor-in-Chief

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Toxicology) / CiteScore - Q1 (Toxicology)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 19.5 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2025).
