

Special Issue

Toxins and Infectious Diseases

Message from the Guest Editors

Toxins are one of the most common virulence factors produced by different human pathogens. Moreover, toxins are used by bacteria to colonize different environments. Therefore, toxins can also be used as scaffolds to develop new antimicrobial treatments. This Special Issue will focus on the role of toxins and anti-toxin compounds in human health. We invite you to present the latest research in the field of toxins, treatments against them and any point of view that can highlight the importance of the use of some toxins as new scaffolds for antimicrobial treatments. We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

Toxinology is an incredibly diverse area of study, ranging from field surveys of environmental toxins to the study of toxin action at the molecular level. The editorial board and staff of *Toxins* are dedicated to providing a timely, peer-reviewed outlet for exciting, innovative primary research articles and concise, informative reviews from investigators in the myriad of disciplines contributing to our knowledge on toxins. We are committed to meeting the needs of the toxin research community by offering useful and timely reviews of all manuscripts submitted. Please consider *Toxins* when submitting your work for publication.

Editor-in-Chief

Prof. Dr. Jay Fox

Department of Microbiology, University of Virginia, Charlottesville, VA,
USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Toxicology) / CiteScore - Q1 (Toxicology)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.4 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2025).
