

Special Issue

Foodborne Toxins and Public Health

Message from the Guest Editors

This Special Issue in *Toxins* aims to collect the latest investigations on the toxins responsible for food poisoning, by addressing the topic from multiple points of view. We are particularly interested in contributions describing: - Laboratory methods for the detection, identification and quantification of toxins responsible for food poisoning that can be applied to official controls, HACCP plans or ongoing FBO investigations. - Studies of the factors favoring the synthesis of toxins and reliable methodologies suitable for implementation in industries for HACCP plans, and process management to reduce the risk of toxin production. - Investigation tools and epidemiological models to be applied in the case of foodborne toxins outbreak and epidemiological investigations. - Safe food production strategies with reference to the control of toxins responsible for foodborne disease. - Description of public-health system, competent authority network and academics cooperating together in different countries to manage food safety to limit food poisoning.

About the Journal

Message from the Editor-in-Chief

Toxinology is an incredibly diverse area of study, ranging from field surveys of environmental toxins to the study of toxin action at the molecular level. The editorial board and staff of *Toxins* are dedicated to providing a timely, peer-reviewed outlet for exciting, innovative primary research articles and concise, informative reviews from investigators in the myriad of disciplines contributing to our knowledge on toxins. We are committed to meeting the needs of the toxin research community by offering useful and timely reviews of all manuscripts submitted. Please consider *Toxins* when submitting your work for publication.

Editor-in-Chief

Prof. Dr. Jay Fox

Department of Microbiology, University of Virginia, Charlottesville, VA,
USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Toxicology) / CiteScore - Q1 (Toxicology)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.4 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2025).
