

Special Issue

Application of Botulinum Toxins in Diseases Treatment

Message from the Guest Editors

Botulinum toxins are widely used to improve diverse symptoms in humans. A PubMed search (botulinum, toxin, treatment; human) of the years 2018–2022 yielded a total of 4431 citations showing the immense importance for human health. This Special Issue will focus on the broad spectrum of botulinum toxins used in clinical treatments. We cordially invite you to present the latest research in the field of botulinum toxins' application in your patients, highlighting known or even new indications for those toxins. In addition, reports are welcome, where patients did not profit from applications or dosages. Animal studies that provide a theoretical background for better knowledge of the mode of botulinum action will also be considered. We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

Toxinology is an incredibly diverse area of study, ranging from field surveys of environmental toxins to the study of toxin action at the molecular level. The editorial board and staff of *Toxins* are dedicated to providing a timely, peer-reviewed outlet for exciting, innovative primary research articles and concise, informative reviews from investigators in the myriad of disciplines contributing to our knowledge on toxins. We are committed to meeting the needs of the toxin research community by offering useful and timely reviews of all manuscripts submitted. Please consider *Toxins* when submitting your work for publication.

Editor-in-Chief

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Toxicology) / CiteScore - Q1 (Toxicology)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.4 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2025).
