

## Special Issue

# Passive Immunotherapy and Its Applications in Envenomation and Infectious Diseases: In Tribute to Gaston Ramon (1886–1963)

### Message from the Guest Editor

Passive immunotherapy (or serum therapy against diphtheria, tetanus, venoms or virus) has developed gradually since its discovery in 1894 by Césaire Phisalix and Albert Calmette separately. To date, many improvements have been made to obtain the high-efficacy and high-tolerance products that we use today. In 2023, we will commemorate sixty-year anniversary of the death of Gaston Ramon (1886–1963). G. Ramon was a veterinarian and immunologist who made major contributions to the enhancement of immunization, through the development of flocculation, toxoids, adjuvants and antigen combinations for vaccination. Despite 155 independent nominations for the Nobel Prize in Medicine between 1930 and 1953, a record number of nominations, G. Ramon never received this prize. This Special Issue aims to provide an update of Gaston Ramon's various discoveries in the field of passive immunotherapy and its applications in the context of envenomation and infectious diseases.

## About the Journal

### Message from the Editor-in-Chief

Toxinology is an incredibly diverse area of study, ranging from field surveys of environmental toxins to the study of toxin action at the molecular level. The editorial board and staff of *Toxins* are dedicated to providing a timely, peer-reviewed outlet for exciting, innovative primary research articles and concise, informative reviews from investigators in the myriad of disciplines contributing to our knowledge on toxins. We are committed to meeting the needs of the toxin research community by offering useful and timely reviews of all manuscripts submitted. Please consider *Toxins* when submitting your work for publication.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, AGRIS, and other databases.

#### Journal Rank:

JCR - Q1 (Toxicology) / CiteScore - Q1 (Toxicology)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.4 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2025).
