Special Issue

Global and Transdisciplinary Research on Venom Evolution, Function, and Applications

Message from the Guest Editors

Venom research is both transdisciplinary and transboundary. Unraveling the complexity of venom evolution and function requires concerted and collaborative input from scientists across the STEM fields. This Special Issue welcomes contributions (e.g., expert reviews, original research articles, short communications) that focus on theoretical or applied aspects at the cutting edge of the study of venom and toxin evolution, function, and translational applications. We also welcome manuscripts focused on the socio-economic and human health impacts of venom. A brighter future in the understanding of venom diversity will be achieved by the development of more holistic studies of venom systems and increased collaboration of an international conglomerate of experts fascinated by this complex trait. It is hoped that this Special Issue will complement recent efforts aimed at achieving such integration in the field.

About the Journal

Message from the Editor-in-Chief

Toxinology is an incredibly diverse area of study, ranging from field surveys of environmental toxins to the study of toxin action at the molecular level. The editorial board and staff of *Toxins* are dedicated to providing a timely, peer-reviewed outlet for exciting, innovative primary research articles and concise, informative reviews from investigators in the myriad of disciplines contributing to our knowledge on toxins. We are committed to meeting the needs of the toxin research community by offering useful and timely reviews of all manuscripts submitted. Please consider *Toxins* when submitting your work for publication.

Editor-in-Chief

Prof. Dr. Jay Fox
Department of Microbiology, University of Virginia, Charlottesville, VA, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Toxicology) / CiteScore - Q1 (Toxicology)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.4 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2025).
