

Special Issue

Potential Risks and Analytical Challenges of Mycotoxins in Food and Feed

Message from the Guest Editor

The ubiquitous presence of mycotoxins in food and feed presents an ongoing challenge to global health and agricultural economies. Addressing these challenges requires a comprehensive understanding of the diverse mycotoxin types, their occurrence, and innovative analytical strategies. This Special Issue on the potential risks and analytical challenges of mycotoxins in food and feed aims to explore the critical aspects of mycotoxin contamination in food and feed, focusing on the associated risks and analytical hurdles. It will shed light on the latest advancements in mycotoxin detection, mitigation, and regulatory efforts, and bridge the gap between scientific insights and practical applications. I invite you to submit your research. Submitted manuscripts may include original research articles, reviews, and concise communications investigating mycotoxin detection, impact, and countermeasures that can help foster collaboration and knowledge exchange, and generate transformative insights for safer food and feed systems.

About the Journal

Message from the Editor-in-Chief

Toxinology is an incredibly diverse area of study, ranging from field surveys of environmental toxins to the study of toxin action at the molecular level. The editorial board and staff of *Toxins* are dedicated to providing a timely, peer-reviewed outlet for exciting, innovative primary research articles and concise, informative reviews from investigators in the myriad of disciplines contributing to our knowledge on toxins. We are committed to meeting the needs of the toxin research community by offering useful and timely reviews of all manuscripts submitted. Please consider *Toxins* when submitting your work for publication.

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Toxicology) / CiteScore - Q1 (Toxicology)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.4 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2025).
