

## Special Issue

# Botulinum Toxins: New Uses in the Treatment of Diseases (2nd Edition)

### Message from the Guest Editor

It is my pleasure to announce a new Special Issue dedicated to the therapeutic applications of botulinum toxins. This Special Issue is configured as the continuation of the previous one entitled "Botulinum Toxins: New Uses in the Treatment of Diseases" of which it constitutes the second edition. The purpose of this Special Issue is to update the scientific community on the possible developments of new therapeutic applications of botulinum toxin, also considering the fact that, to date, the list of human pathologies in which botulinum toxin produces favorable effects is constantly growing. This Special Issue is open to any type of contribution, such as reviews, research articles, both in animal models and clinical studies, case reports, or off-label indications. Contributions that explain the mechanisms of action of botulinum toxins, in the various pathologies where they exert their therapeutic action, are also welcome.

## About the Journal

### Message from the Editor-in-Chief

Toxinology is an incredibly diverse area of study, ranging from field surveys of environmental toxins to the study of toxin action at the molecular level. The editorial board and staff of *Toxins* are dedicated to providing a timely, peer-reviewed outlet for exciting, innovative primary research articles and concise, informative reviews from investigators in the myriad of disciplines contributing to our knowledge on toxins. We are committed to meeting the needs of the toxin research community by offering useful and timely reviews of all manuscripts submitted. Please consider *Toxins* when submitting your work for publication.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, AGRIS, and other databases.

#### Journal Rank:

JCR - Q1 (Toxicology) / CiteScore - Q1 (Toxicology)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 19.5 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2025).
