

Special Issue

Research on Botulinum Toxin for Urinary System Diseases and Pelvic Pain

Message from the Guest Editors

The aim of this Special Issue is to present a collection of articles by pioneers in the actual knowledge on the use of botulinum toxin in urology, known and possible mechanisms of action, and to describe their trials and drawbacks. This Special Issue also aims to describe the use of other botulinum toxin A and new developments in the administration route of the urological field. Topics of interest include (but are not limited to):

- Mechanism of action in OAB, NDO, BPS/IC
- Therapy failure
- New indication
- New route of administration

We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

Toxinology is an incredibly diverse area of study, ranging from field surveys of environmental toxins to the study of toxin action at the molecular level. The editorial board and staff of *Toxins* are dedicated to providing a timely, peer-reviewed outlet for exciting, innovative primary research articles and concise, informative reviews from investigators in the myriad of disciplines contributing to our knowledge on toxins. We are committed to meeting the needs of the toxin research community by offering useful and timely reviews of all manuscripts submitted. Please consider *Toxins* when submitting your work for publication.

Editor-in-Chief

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Toxicology) / CiteScore - Q1 (Toxicology)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 19.5 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2025).
