

Special Issue

Cyanobacterial Toxin and Secondary Metabolite Detection, Fate and Toxicity Assessment

Message from the Guest Editors

This Special Issue aims to highlight novel research on toxins and secondary metabolites produced by cyanobacteria, with focus on

- Analytical methods for identification and quantification
- Occurrence in surface waters or simulated field conditions
- Toxicity to aquatic organisms and human health hazards and effects
- Assessment and management of ecological and human health risks of cyanobacteria and cyanotoxins
- New discoveries of secondary metabolites from cyanobacteria

Guest Editors

Dr. Elisabeth Janssen

About the Journal

Message from the Editor-in-Chief

Toxinology is an incredibly diverse area of study, ranging from field surveys of environmental toxins to the study of toxin action at the molecular level. The editorial board and staff of *Toxins* are dedicated to providing a timely, peer-reviewed outlet for exciting, innovative primary research articles and concise, informative reviews from investigators in the myriad of disciplines contributing to our knowledge on toxins. We are committed to meeting the needs of the toxin research community by offering useful and timely reviews of all manuscripts submitted. Please consider *Toxins* when submitting your work for publication.

Editor-in-Chief

Prof. Dr. Jay Fox

Department of Microbiology, University of Virginia, Charlottesville, VA,
USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Toxicology) / CiteScore - Q1 (Toxicology)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.4 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2025).
