

Special Issue

Botulinum Toxins and Children's Health

Message from the Guest Editors

Since 1989, when botulinum neurotoxin (BoNT) was licensed for the treatment of strabismus, its use in medicine has become largely widespread, with an increasing range of indications and the addition of new formulations. However, there are still several controversies about the appropriate uses and dosing of this neurotoxin in the pediatric population. Based on a review of the current literature and original papers, the goal of this Special Issue is to provide an update concerning all possible indications (urological, neurological, and any related modalities of administration of BoNT in the pediatric population). A list of areas/topics of interest include but are not limited to -

- Neurourology;
- Urodynamics;
- Pediatric Urology and Surgery;
- Neurology and Neurophysiology;
- Ophthalmology;
- Colonproctology;
- Histology;
- Pharmacology;
- Dentistry;
- Pain;
- Rehabilitation.

About the Journal

Message from the Editor-in-Chief

Toxinology is an incredibly diverse area of study, ranging from field surveys of environmental toxins to the study of toxin action at the molecular level. The editorial board and staff of *Toxins* are dedicated to providing a timely, peer-reviewed outlet for exciting, innovative primary research articles and concise, informative reviews from investigators in the myriad of disciplines contributing to our knowledge on toxins. We are committed to meeting the needs of the toxin research community by offering useful and timely reviews of all manuscripts submitted. Please consider *Toxins* when submitting your work for publication.

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Toxicology) / CiteScore - Q1 (Toxicology)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.4 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2025).
