Metabolism of Mycotoxins by Animals and Microbes

Message from the Guest Editor

The more we know about the metabolism of mycotoxins, the better the exposure to mycotoxins can be assessed and the better their negative effects can be mitigated. While the in vivo fate of selected mycotoxins has been extensively studied, the metabolism of other mycotoxins has only partly been elucidated. In addition, for some of the well-investigated mycotoxins, great differences in metabolism have been discovered between animal species. Considering that it took decades to elucidate the in vivo fate of some of the most common and most studied mycotoxins, more timely research on the metabolism of other mycotoxins is warranted.

About the Journal

Message from the Editor-in-Chief

Toxinology is an incredibly diverse area of study, ranging from field surveys of environmental toxins to the study of toxin action at the molecular level. The editorial board and staff of *Toxins* are dedicated to providing a timely, peer-reviewed outlet for exciting, innovative primary research articles and concise, informative reviews from investigators in the myriad of disciplines contributing to our knowledge on toxins. We are committed to meeting the needs of the toxin research community by offering useful and timely reviews of all manuscripts submitted. Please consider *Toxins* when submitting your work for publication.

Editor-in-Chief

Prof. Dr. Jay Fox

Department of Microbiology, University of Virginia, Charlottesville, VA,
USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Toxicology) / CiteScore - Q1 (Toxicology)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.4 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2025).
